**Reading Comprehension Practice Test**

**The Big Game**

It was a beautiful day to play a game. The boys were excited. They had been waiting for weeks to play a game. They had been waiting for weeks to play a game. They had been waiting for weeks to play a game.

1. What sport are they playing?  
 Basketball  
 Football  
 Soccer  
 Tennis

2. What time does the game start?  
 2:00 PM  
 3:00 PM  
 4:00 PM  
 5:00 PM

3. Why are they playing?  
 To win  
 To have fun  
 To practice

4. What is the score?  
 1-0  
 2-0  
 3-0

5. Who scored the winning goal?  
 John  
 Tom  
 Mike

**Read the story and answer the questions.**

**Sam and Sam's New Game**

Sam and Sam's new game was very different. They had an exciting new game. They had an exciting new game. They had an exciting new game.

1. How is the game different?  
 It is played on a different field.  
 It is played with different rules.  
 It is played with different equipment.

2. How is it played?  
 It is played with a ball.  
 It is played with a net.  
 It is played with a goal.

3. Why is it called 'Sam and Sam's New Game'?  
 Because it was invented by Sam and Sam.  
 Because it is a new game.

4. How do you play it?  
 You play it with a ball.  
 You play it with a net.  
 You play it with a goal.

5. What is the score?  
 1-0  
 2-0  
 3-0

**Charge It!**  
**Cross-Curricular Focus: Physical Science**

Many people do not really understand how electricity works. They just know that when they need power to run an appliance, they have to plug it into the wall.

Energy comes from charged particles that are moving around. Have you ever rubbed a balloon against your clothes to make it stick? Have you held a balloon or a comb over someone's head to watch his hair stand up straight? That's static electricity and electrically charged particles. But these particles don't do much unless we control their energy.

Static electricity builds up on certain materials. Other materials, though, let electrical charges flow through them. This creates an electric current. Electric current travels very easily through metals like copper, gold, silver, and aluminum. We call materials that electric current flows through easily **conductors**. Water is also a good conductor of electricity. That's why electrical charges can travel through people, too. There is water in every cell of a person's body. Electric current can travel through these cells.

Since metal is a good conductor of electricity, electrical wires are often made out of metal. Wiring can also be made out of non-metal materials, such as graphite.

Conductors have to be enclosed in a material that is an **insulator**. Insulators do not allow electric current to pass through them. The rubber coating that you see on electrical cords covers the metal. The electric current stays inside the cord so we can direct the current to the appliance that needs power. Other good insulators are glass and some plastics.

Cross-Curricular Reading Comprehension Worksheets 0-20 of 28

Name:

Answer the following questions based on the reading passage. Don't forget to go back to the passage whenever necessary to find or confirm your answers.

- What are two materials that are good conductors of electricity?  
\_\_\_\_\_
- How is static electricity different from electric current?  
\_\_\_\_\_
- What could happen if the rubber coating on a power cord is damaged?  
\_\_\_\_\_
- Is water a conductor or an insulator?  
\_\_\_\_\_
- In your own words, explain the difference between a conductor and an insulator.  
\_\_\_\_\_

**Another Aboriginal myth**

Read this Aboriginal myth about fire and answer the questions that follow.

**The Capture of Fire**

Goodah, a noted magician, captured a piece of lightning as it struck a dead tree during a storm. He imprisoned it as a convenient way to make fire for his own use and ignored demands that he share this wonderful discovery. At last the tribe became so enraged with Goodah that a group of elders called up a whirlwind just as Goodah had made a fire with his piece of lightning. The whirlwind picked up the fire and scattered it all over the country, and fire became common property when members of the tribe picked up enough burning wood to make fires for themselves.

To escape the jeers and laughter of the tribe, Goodah fled to the hills to sulk, and to plan revenge.

From *Princesses* (Wings by A. and M. J. Roberts)

How would you describe Goodah's behavior?

.....

.....

.....

What does common property mean?

.....

.....

.....

Do you think Goodah was right to feel angry with the tribe for calling up a whirlwind?

.....

.....

.....

**Reading a text**

Read the text, then answer the questions in capital letters.

The Voice of Nature

An Aboriginal myth from northern Australia tells how, at the beginning of time, the Ancestress spoke each day from a great granite tree, and the other people gathered to listen. But one day the people grew weary of hearing her words of wisdom. One by one they turned their backs on the tree to pursue their own pleasures and a war broke out over the whole of the land and the sea. There was no end and the rain never fell. The tree was so worried at the punishment of their own actions that it spoke through the earth to bring the rain. The rain came and the people were happy again. They were so glad that they spoke through the granite tree again and again, trying to hear the words that would save their lives. And so the Voice of Nature spoke again.

The old stories were the first time the voice would be heard, but that he would give them a sign. The great tree spoke again, a long voice of fire came down from the sky and there it stood again.

Since that time the Aboriginals have known that the voice of their Ancestress speaks in all things, and speaks to them through every part of nature.

From *Princesses* (Wings by A. and M. J. Roberts)

Why did the tribe traditionally gather around the great granite tree?

.....

Why did the people abandon the custom long ago?

.....

What happened to the natural world when the people broke the tradition?

.....

What feelings made the people return to the tree?

.....

These reading passages were created to help students and teachers working on reading in the content area. We encourage you to minimize this distraction when students are reading. We expect readers to begin to make sense of text in a wide variety of settings. Students begin to prepare for college course work and take on much more difficult levels of thought. When our brains automatically do cognitive work—like summarize—we remember more of what we read. When they complete the work, they should compare their original thoughts with what they learned after completing the work. MORE FROM QUESTIONSANSWERED.NET How the Internet Travels Across the OceanHow the Internet Travels Across the OceanChildren learn how the internet travels across the ocean through cables to create a giant, global information network in this engaging, hands-on worksheet.4th gradeReading & Writing Skip to main content Use these free, printable worksheets to practice and improve reading comprehension, vocabulary and writing at a grade 4 level. On the ReadWorks website, you can search for worksheets by grade level, text type and topic. We highly encourage teacher at this level to include some form of daily independent reading activity in their routines. Helping them learn to concentrate their efforts on the latter can pay a lifetime of benefits. Others are more collaborative and give teachers a place to share best practices and materials with others. You can find reading passages with question sets and vocabulary support to help children practice and improve their reading skills. If there are words or concepts that you don't understand, look them up in a dictionary or online and add them to your vocabulary list (or ask someone about them). The good news is that there are many strategies you can use to read more effectively and improve your understanding of what you read, no matter what type of material it is. Grade 4 reading comprehension worksheet At this level students are working on discriminating words and sounds. However, improving these skills can seem like an insurmountable task if you don't know where to start. Creating a reader's nook in your classroom can also enhance their affinity towards putting the time in on the books. Understand Your Purpose When you read, first decide why you're putting time into it: is it for information, amusement or reference? Students at this level are starting to prepare for college admissions to some extent and broadening their horizons should be your focus. Set aside an hour or two each day for reading comprehension work and make sure it counts. This will help them to remember what they take in and using outlines can help a great deal as well. When our brain is tied up processing new information, it doesn't have any resources left over to create long-term memories. Those that have a low vocabulary index often have a weaker ability to comprehend. Read With a Pen It may seem ridiculous, but it works. Here are 5 ways you can use to improve your ability to comprehend what you read. Constructing a mental picture in your mind as you read is a helpful activity. Book publishers sometimes produce worksheets to pair with their books. Just skimming over something won't improve your skills very much at all. For example, the company Reading Horizons has downloadable phonics worksheets that work with its digital phonics program and face-to-face lessons. Students should focus on building words properly in their mind as they read. Many follow the formats used on state and local tests that measure reading ability. When children need extra practice using their reading skills, it helps to have worksheets available. Knowing your purpose helps get you in reading mode. We would highly recommend daily work with extended passages for students. Reviewing these words constantly can have huge dividends as they enter their college years. Things start to become much more content based as students approach high school. If you're looking for additional practice while reading a specific book, check out their websites for graphic organizers and comprehension questions.You also can purchase collections of traditional and homeschool worksheets in digital books arranged by reading level. This is usually when the major national assessments start to appear. But you can often digest a document better by reading it at 50 percent or even 25 percent of that speed—as long as you're skimming and scanning with purpose. These worksheets usually are samples from the books they publish so that you can preview the content. 1. We created this as a miscellaneous reading section for students of all levels. The teachers sometimes include anecdotal notes and tips for making the worksheets more effective.Publisher WebsitesPublishers of textbooks, education research and professional development books sometimes offer worksheets on their websites. A good place to start with a few simple paragraphs at a time and summarizing what you've just read in your head before moving on. Many of these collections are themed by genre or subject matter. This makes it easy to select worksheets that match the child's interest or to build background knowledge in specific areas.Teacher Resource SitesWhether you're a teacher or a parent, teacher resource websites are another option for finding reading worksheets. If you're looking for materials to use in a homeschool setting or for after-school practice, check out these sites. Being an avid reader is only one of the components of helping your comprehension. Our brains need time to process new information to fully understand what we read. If you can try to pick works that are targeted for your lower level students, you might just engage them more. Because these programs are geared toward children learning the English language, they incorporate social studies and science lessons along with the reading skills.Nonprofit Literacy GroupsOrganizations like ReadWorks and edHelper have reading comprehension worksheets available on their websites. 4. One way is to create flashcards and quiz yourself, and another is simply reading a large quantity of material. Some sites like Teachers Pay Teachers let teachers upload worksheets they've created and offer them for sale. We are just focused on recognizing general themes at this point. But also, try using some of our tips next time you find yourself with a page or screen in front of you and want something more out of it than just text or data. This is where students start to begin reading classic literature and see new forms of language they have not seen until now. Skimming allows your brain to get familiar with what you're taking in through eyes so that when you go back through and start actually processing it, it's easier to absorb the information. Another thing you can do is try using context clues when trying to figure out difficult words. You can even try highlighting or underlining certain lines as an alternative if writing with a pen isn't your thing. The key to improving your reading comprehension lies in leveraging your inherent ability and some smart techniques. This has been documented by a number of curriculum committees from the literature that I have seen, so I would not expect that trend to continue much longer. The key here is to push yourself harder than you usually do. 5. This is where students are urged to begin sharing their opinions of works. The best way is to read! In fact, read anything you can get your hands on. Keeping that pen in hand forces you to process what you're reading and lets you naturally improve your vocabulary. They can use those words in their own body of work, while writing, and recognize their use in the works of others. Practice Exercises Practice makes a man perfect! This can be accomplished in different ways. So, every time we come across something important or interesting—whether it's a fact, an opinion, or just a snippet of dialogue—jot it down. Whenever you come across a word you don't know, circle it and keep going. We highly encourage students to discuss what they read to find hidden meanings that they may have missed. Most of us read at a pace between 200 and 300 words per minute. We concentrate a great deal on letters and the sounds that they make. 2. You should have them try to determine the plot of the story just from the title. Use the Skim and Scan Approach Skim for facts, scan for ideas. At this level we start to really encourage students to take notes as they read. Take Notes Read and write. This will pay you back ten-fold, if you can maintain a productive environment for students. In addition to the worksheets, you get access to a community of educators who can help you find the right materials for your children.Literacy ProgramsEven for-profit literacy programs offer free worksheets for parents and teachers. This helps them critically analyze text at a heightened level. Have them write their own questions that were not part of the worksheet. The absolute for teachers at this level has to be on making it money and getting in as much repetition as you can. This makes it easy to find worksheets that meet the child's specific needs. One advantage of using these worksheets is that they are designed for specific reading levels and have been tested in a classroom. This is where they encounter any word, they are uncertain of in a journal. We encourage you to start setting monthly goals for your students. This approach helps understand where sentences are going and makes connecting ideas much easier. If you want to get the most out of what you read, whether you're pursuing your favorite hobby or improving yourself in school, it's essential to improve your reading comprehension skills. Students begin to read lengthy works and start to work on their reading endurance. The work we have seen come out of most states and provinces has been focused on nonfiction for this level. English learner sites are other good sources. This is usually when most parents provide their children with mobile phones to stay in contact and keep tabs on their more independent children. Instead, focus on your ability to pick out important details from what you read. It usually comes down to vocabulary words. You can find an assortment of printable reading worksheets for free and for sale on several websites.Teacher WebsitesThere are several teacher websites where you can download reading comprehension worksheets they created for their classrooms. At this level we encourage teachers to share the books that they are reading independent with students. It is great to help them transition to writing about what they read. This series is really broad and is meant for extra practice for students in the grade range. Although they're usually designed for use with the company's program, you can use them for other lessons. Show students how to keep a vocabulary log. 3. At this point students have a deeper vocabulary and we can ask them to begin to infer contextual meaning to a small degree. Teaching children to read is an important skill they'll use for the rest of their lives. This is where we want our students to be more reflective of their own skills. It also helps reduce distractions (you won't be looking at social media) and encourages deeper thinking (you have to remember what you read). At this age they are well aware of what they do well and what they grapple with. This is where we start to ask students real questions from page long passages. We find at this level that there is a clear divide between those students that are struggling to keep the head above water and those that cruising right along. When you're done reading, go back and look up each of those words in your dictionary or online.
